EXTRACTION TECHNOLOGY FOR MAXIMUM EFFICIENCY

## THE ESTA eco<sup>+</sup> SERIES – REDEFINING EFFICIENCY

The devices in the **eco<sup>+</sup>** series set new standards for energy-efficient extraction systems. The series provides the ideal balance between the three decisive parameters of an extraction device:

- » Acquisition costs
- » Operating costs
- » Effectiveness

### THE FILTERSYSTEM:

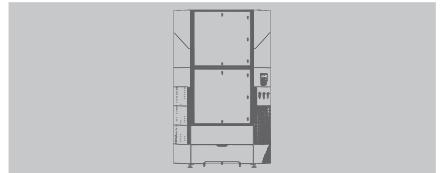

- » **Special pre-separation systems, developed and patented by ESTA\***, separate coarse particles and sparks and thus reduce the load on the downstream fine filter to a minimum. The result is a long fine filter life and high system reliability.
- » **Cleanable long-lasting filters** filter the remaining fine dusts with a separation rate of over 99.9% – for maximum air purity. The low filter load resulting from the pre-separation system means that the fine filter lasts longer and keeps filter costs low.
- » **The filter is cleaned** by means of a pulse-jet, which cleans the filter during operation and after the device has been switched off. This ensures consistent extraction performance with low compressed air consumption.

\* Depending on the type of device

### THE VACUUM UNIT:

- » **High performance ventilators** with above-average efficiency ensure maximum extraction performance.
- » **Drive motors** with an efficiency class of IE2 are combined with frequency converters in line with the latest efficiency requirements. The performance of the motors can be adjusted based on the parameters required, thus always remaining in the optimal working range.

### THE HOUSING DESIGN:

- » **The raw gas channel** in the filter chamber guarantees uniform application of the filter elements and low pressure loss. Thanks to the low flow speed, the filters can be cleaned even during operation.
- » **The clean airflow with low pressure loss** ensures low output losses and a low flow noise. Extensive air outlets allow low-draught air return to the working area.

## THE DEVICE CONTROL – REDUCED ENERGY CONSUMPTION, LONGER FILTER LIFE, MORE EFFICIENT CLEANING

- » The newly-developed **ESTA EasyControl** allows energy-efficient device operation as the sensor signals are optimally processed. Measuring the current volume flow and adapting it to the operating

parameters produces **power savings of up to 50%** compared to conventional differential pressure control.

In addition to the **ESTA EasyControl** device control, standard features of the **eco<sup>+</sup>** devices include the following:

- » Frequency converter for fan motors
- » Programmable timer
- » Dust measuring sensors in raw gas and clean air areas (FILTOWER)
- » Level measurement in collection container (FILTOWER)

## FILTOWER eco<sup>+</sup>

Hall ventilation system for extraction of welding fumes, dust and oil mist. FILTOWER systems work according to the layer and displacement ventilation principle recommended by the Employers' Liability Association. The systems draw polluted air into the top of the device from a radius of up to 15 meters (depending on performance level). The cleaned air is returned to the hall via diffusers on the sides at floor level, with minimal draught.

## TECHNICAL DATA

		FILTOWER 100	FILTOWER 160	FILTOWER 200
Max. Airflow	m <sup>3</sup> /h	13.000	18.200	22.000
Max. negative pressure	Pa	2.800	2.800	2.800
Voltage	V	400	400	400
Motor	kW	2 x 3.0	2 x 4.0	2 x 7.5
Filter surface	m <sup>2</sup>	100	160	200
Filter elements	Piece	4	4	4
Dust collection container	l	150	150	150
Dimensions (L/W/H)	mm	2.060 x 1.510 x 2.950	2.060 x 1.510 x 3.350	2.060 x 1.510 x 3.850
Weight	kg	950	1.200	1.500
Sound emission	dB(A)	71	75	77
<b>Order Number</b>				
FILTOWER F eco <sup>+</sup>		670100	670160	670200
FILTOWER D eco <sup>+</sup>		671100	671160	671200
FILTOWER L eco <sup>+</sup>		672100	672160	672200

### FILTOWER F eco<sup>+</sup>

#### Ideal for

Welding fume

Soldering fume

### FILTOWER D eco<sup>+</sup>

#### Ideal for

Light, floating fine dusts

Chemical dust

Bulk material applications

### FILTOWER L eco<sup>+</sup>

#### Ideal for

Aerosols

Oil mist

Emulsion mist

Fumes

## SPECIAL FEATURES:

- » Two ventilators connected in parallel
- » Pre-separation system\* for large particles
- » New **ESTA QuickChange\*** filter change system for dust-free and time-saving cartridge filter replacement.
- » Dust-free discharge of the separated contaminants via a removable 150-litre collection tray\*\*
- » Optional **W3** test certificate.
- » Available in many special designs

\* Patent pending

\*\* Depending on device version

Product-Video

## MOBEX eco<sup>+</sup>

Universally applicable compact dust extractor for dust, shavings and welding fumes. The devices are designed for single or multi-location extraction. Up to four extraction points can be operated simultaneously via a pipe system.

## TECHNICAL DATA

		F-40	F-60
Max. Airflow	m <sup>3</sup> /h	2.800	4.500
Intake diameter	mm	224	280
Max. negative pressure	Pa	3.400	3.400
Voltage	V	400	400
Motor	kW	3.0	4.0
Filter surface	m <sup>2</sup>	40	60

Dust collection container	l	2 x 38	2 x 38
Dimensions (L/W/H)	mm	1.910 x 1.040 x 2.030*	2.030 x 1.040 x 2.030*
Weight	kg	310	350
Sound emission	dB(A)	71	74
<b>Order Number</b>		<b>09848</b>	<b>09849</b>
MOBEX F eco <sup>+</sup>			

\* without spark trap

### MOBEX F eco<sup>+</sup>

#### Ideal for

Welding fume  
Soldering fume

### MOBEX P eco<sup>+</sup>

#### Ideal for

Metal dust  
Cuttings  
Chipped plastics  
Plastic dust

Product-Video

#### SPECIAL FEATURES:

- » High extraction efficiency
- » Low operating noise thanks to sound-insulated housing
- » Minimal space requirement due to compact design
- » Easy and dust-free discharge of collected material through a new disposal system
- » Optional W3 or H test certificate
- » Available in many special designs

		P-24	P-36

## DUSTOMAT 4 eco<sup>+</sup>

The DUSTOMAT 4 is the ideal device for single or multi-location extraction of free-flowing and dry dust – both for direct extraction at a processing machine and for connection to a pipe system.

### Ideal for

- CFK-/GFK dust
- Chemical dust
- Wood dust
- Metal dust
- Plastic dust

### SPECIAL FEATURES

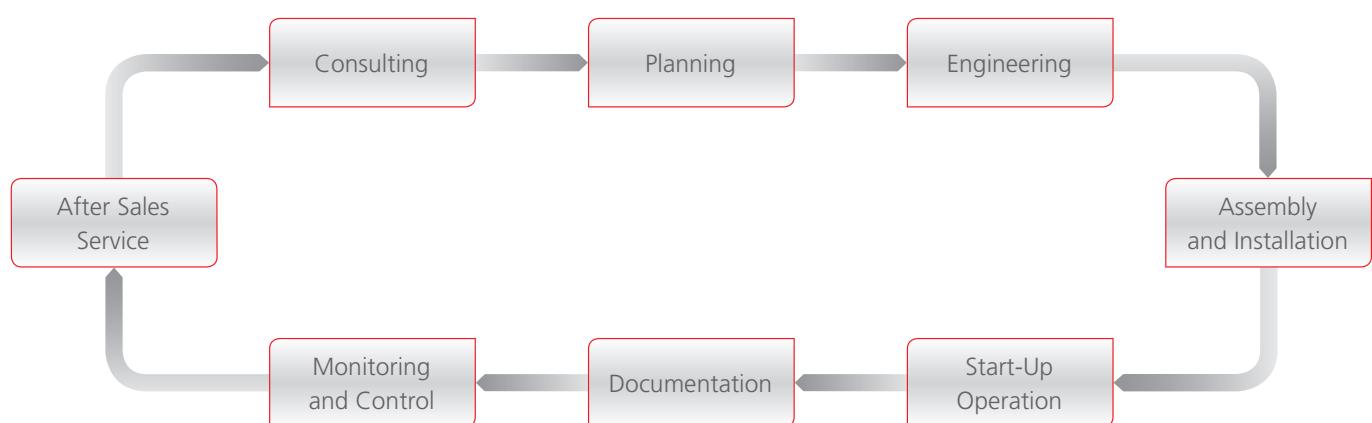

- » High extraction efficiency combined with good mobility
- » Very low operating noise, can be set up directly in the work area
- » Removable dust collection tray for easy discharge
- » Very user-friendly and easy to maintain
- » Optional test certificate
- » Available in many special designs

## HIGH QUALITY: LONG-LIVED AND PERSISTENT EQUIPMENT FOR OUR CUSTOMERS

## ESTA – THE SPECIALIST FOR EXTRACTION TECHNOLOGY

ESTA extraction technology has provided comprehensive solutions for all application areas for more than 40 years. From single devices for a wide range of application purposes to complex extraction systems – we ensure a clean working environment at all times. This protects machines, benefits your employees' health and lays the groundwork for efficient and quality-oriented working.
