

Dust extractor **DUSTOMAT**_{DRY}

The new safety standard protecting you and your work force

The compact dust extractors of the DUSTOMAT DRY series are **suitable for almost all applications** thanks to their versatile configurations, including ATEX certification, HEPA filtration, and activated carbon options, effectively extract dusts that occur when processing a variety of materials including metal, plastic and composites (**separation efficiency of up to 99.995 %**).

Thanks to **air flow optimisation**, the filters of the DUSTOMAT DRY series have even higher energy efficiency compared to their predecessors. The **innovative filter cleaning system offers up to 50% saving in compressed air consumption**, coupled with an **extended filter service life**, means a significant reduction in ongoing running costs.

Your benefits

- » Configurable: performance, filter package, system structure
- » Powerful suction for optimal performance
- » Energy-efficient thanks to aerodynamically optimization
- » 50% reduction compressed air consumption thanks to innovative cleaning system
- » Low-noise system operation thanks to noise-optimized design
- » Recirculation or exhaust air operation options
- » Intuitive operation thanks to the convenient touch display
- » Simple disposal using a mobile dust collection drawer with liner
- » Compact design
- » Special designs (ATEX, H, activated carbon filter, etc.)

ESTA Extraction Technology

ESTA extraction technology has provided comprehensive solutions for all application areas for more than 50 years. From single devices for a wide range of application purposes to complex extraction systems – we ensure a clean working environment at all times. This protects machines, benefits your employees' health and lays the groundwork for efficient and quality-oriented working.
